

Robotic Prostatectomy 3D Animation

{youtube}_atrOj_MjU|400|400|1{/youtube}

Benefits of the da Vinci Prostatectomy are : Effective Cancer Control, Improved and Early Return of Sexual Function, Improved and Early Return of Continence, Improved Results Over Traditional Treatments, Minimally Invasive Surgery. Patient benefits may include: Significantly less pain, Less blood loss, Less scarring, Shorter recovery time , A faster return to normal daily activities

Robotic Surgery Demonstration: da Vinci Prostatectomy

{youtube}VJ_3GJNz4fg|500|400{/youtube}

Robotic surgery is the most advanced minimally invasive option for patients facing abdominal or gastrointestinal surgery. Instead of a large abdominal incision used in open surgery, da Vinci surgeons make a few small incisions – similar to traditional laparoscopy. However, the da Vinci System features a magnified 3D high-definition vision system and special wristed instruments that bend and rotate far greater than the human wrist. As a result, da Vinci

enables your surgeon to operate with enhanced vision, precision, dexterity and control.

Many procedures can be performed using the da Vinci Surgical System – offering the latest in surgical and robotics technologies. The da Vinci System is beneficial for performing complex surgery. Your surgeon is 100% in control of the da Vinci System, which translates his or her hand movements into smaller, more precise movements of tiny instruments inside your body. da Vinci – taking surgery beyond the limits of the human hand.

Surgery Demonstration on a Grape: da Vinci Surgical System

{youtube}0XdC1HUp-rU|500|400|{/youtube}

The da Vinci Surgical System is used to stitch a grape back together. The same technology that can be used to suture a tiny grape is designed to help perform delicate, minimally invasive surgery.
